Letter of support to the ORPHEE network project proposal

Dear Colleague,

This is to confirm the support of our Research Centre for Science and Technology for Learning at National Central University of Taiwan to the ORPHEE network project coordinated by Télécom Bretagne, Institut Mines Télécom, on behalf of multiple research groups with different disciplines yet related to technology enhanced learning in France.

I personally have had various present interactions with French technology enhanced learning community dated back to 1993 while I visited France for three months. In 2006, we also collaborated on writing an influential research statement paper on One-To-One (1:1) Technology Enhanced Learning.

This ORPHEE network will certainly help trigger new initiatives and thus consolidate the French and Taiwanese research collaboration endeavour, especially with researchers in our Centre.

Sincerely,

Tak-Wai Chan

Director of Research Centre for Science and Technology for Learning
